PROFILE

Motivated and detail-oriented developer with experience in Python, Django, and Machine Learning projects. Resourceful Django Backend Developer with hands-on experience building scalable APIs, secure authentication systems, real-time chat features, and production-ready backend architectures. Completed multiple end-to-end projects in Django, DRF, JWT, database design, and smooth API integrations for mobile and web apps. Also skilled in Canva and Figma, with a strong creative mindset.

EXPERIENCE

PYTHON DEVELOPER • JUNE 2023 – MAR 2024

Digital Optimizer

- Developed machine learning models to enhance predictive analytics.
- Collaborated with data scientists to optimize algorithms and improve accuracy.
- Engaged in code reviews to maintain high-quality standards and best practices.

BACKEND DEVELOPER • JUNE 2025 - PRESENT

Techanzy Limited

- Built complete backend systems using Django + DRF, from models to production-ready APIs.
- Implemented secure authentication using JWT with full request/response validation.
- Designed and tested APIs extensively in Postman.
- Worked with real-time messaging using Socket.IO and optimized room/connection handling.
- Collaborated with frontend teams for smooth integration across Flutter and web platforms.
- Ensured clean error handling and proper database migrations for all features.

MAJOR PRJOECTS:

- Mehrum - Matchmaking/Matrimonial Platform (Complete Backend Development)
- Nestly - Real Estate Platform Backend
- Listico - Canadian Real Estate Platform
- Sentiment Analysis on 5k twitter data
